

EUCOROL F

Description It is an acrylic water base anti fungus coating .

Properties

- 1-It is used in factories, warehouses, rooms where anti fungus coating is needed .
- 2-Good adhesion to different surfaces .
- 3-Good weathering resistance.
- 4-Good alkali resistance (washable) .
- 5-Could be applied on all types of surfaces as concrete, plaster, bricks and on other water emulsion paints.
- 6-Concentrate and could be diluted up to 25% .
- 7-Covers cracks up to 1 mm.
- 8-Protects surfaces against friction corrosion, erosion, and humidity.
- 9-Resists all weather conditions .
- 10-Provides the substrate protection against fungi and bacteria .
- 11-Is not affected by diluted acid and alkalis, salts, sugars, oil, and grease.

Kinds of fungi and bacteria which is resisted by Eucorol F:-

Achromobacter Sp.	Aspergillus Sp.
Aeromonas Sp.	Botrytis Sp.
Alcaligenes Sp.	Candida Sp. (Yeast)
Bacillus Sp.	Paecilomyces Sp.
Escherichia Sp.	Penicillium Sp.
Flavobacterium Sp.	Rhodotorula Sp. (Yeast)
Klebsiella Sp.	
Proteus Sp.	
Pseudomonas Sp.	

Consumption from 6 to 8m²/kg according to surface porosity

Shelf life at 20oC

12 months

Packing 1 kg , 5 kg, 20 kg .
