

EUCOPRIME

- Description** **EUCOPRIME** is a water based acrylic primer designed specifically for use on masonry surfaces of all types, wood, gypsum.
This product protects surfaces by forming a clear membrane which will prevent moisture penetration.
- Properties**
- 1-Seals out dirt and other staining materials.
 - 2-Compatible with any emulsion paint and any emulsion adhesive.
 - 3- Prevents moisture penetration and is not affected by weathering conditions.
 - 4- Is applied on gypsum blocks and masonry to seal pores and decrease painting consumption.
- Application**
- 1- Dilute **EUCOPRIME** 1:5 by volume with water, stir well until it becomes white in colour.
 - 2- Apply on surface immediately with brush, roller or spray.
 - 3- Drying time 12 to 24 hrs. before using other paints.
- Consumption** 15 to 25 m²/kg after dilution.
Shelf life two years.
- Package** 5 kg, 20 kg drums.
