

EUCOPLASTER

Thin coat mortar for waterproofing

Description **EUCOPLASTER** is a ready to use mortar for waterproofing of concrete surfaces and joints.
EUCOPLASTER is based on cement with carefully graded fine aggregates in combination with selected admixtures .

Main Purpose As thin coat mortar for rigid surface waterproofing .It is particularly suitable for external waterproofing due to its high quality, **EUCOPLASTER** offers many application possibilities as for instance for : external waterproofing against ground moisture , seeping and subsoil water , swimming pools, containers ,water reservoirs ,sewerage plants ,septic tanks ,garage and industrial flooring (under a hard surface) .

Advantages

- EUCOPLASTER** is ready to use product in powder form .
- It consists of cement ,special granulated quartz sand and high grade inorganic sealing ingredients.
- Only a fixed amount of water is added for working .
- EUCOPLASTER** is impermeable under positive and negative loads .
- Extremely good adhesion to sound concrete
- Extremely high workability .
- Easy repair is possible .

Properties	Appearance	powder
	Bulk weight	1,35
	Specific gravity	2,88
	Chloride content	nil
	Colour	gray or white
	Shelf life	well closed , dry stored up to 1 year

Consumption Earth moisture mortar thickness approx. .1-2 mm 2-3 kg/m²
Water pressure mortar thickness approx. . 3-4 mm 6-8 kg/m²

Packing Bags containing 25 kg .
