

EUCO TOP PUTTY

Ready Mix Ceramic Adhesive Putty

Description	Acrylic based ready mix adhesion of ceramic tiles.	
Applications	Eucotop Putty is used for the adhesion of ceramic tiles on to different types of surfaces (rough and smooth) such as: Cement plaster, Gypsum boards, painted walls, brick walls and is also used to adhere Ceramic tiles on to old tiles.	
Advantages	Eucotop Putty can be used to adhere marble tiles and stones on to walls and floors. Eucotop putty is ready to use putty without adding any other materials and can be applied directly with notched trowel to about 2-3 mm to have a good adhesion and form a water proof layer under tiles as in swimming pools. Euoc Top Putty can be used to adhere tiles onto exterior as well as interior surfaces.
