

EUXIT 301
ACRYLIC RESIN QUICK MORTAR

Description

Two component acrylic resin

Main purpose

EUXIT 301 is an impregnation resin for concrete under **EUXIT 300** quick-mortar.

Product characteristics

After proper hardening **EUXIT 301** shows good resistance to acids, alcalyes and chemical solvents and is free of yellowing.

Technical data

Viscosity at 20oC cps	10 - 30
Specific gravity	1,0
Hardening time (hours)	20oC 2
Flash point	10

Surface preparation

Cement bound surfaces must be dry, firm. Offer good traction, and be free from grout, dust and dirt particles, and additionally be free from oil, grease and other impurities which can adversely affect uniform adhesion. If considered necessary, the surface should be sand blasted. Flame scaled or ground.

Application **EUXIT 301** is applied by roller or brush.

Container Packing : 1 x 1 liter

Size & Colour Colour : Colourless.
